- d. Column I, Quantity: The instructions attached to Reference (a) should have stated that all land measurements are to be in acres. Changes have been made in this column on Property Nos. 550, 566, 627, and 658. When a property includes land area of one or more acres one line should be used for recording the land area and a separate line for each building on that land.
- e. Station Office: Property Nos. OFF4 and 5 have been added since we are unable to identify Station Office areas in the Annex, the old and the new Buildings. Our records indicate that \$100,000 was made available to in 1968 for repair of their new building, this amount has been inserted on your summary. The Station Office area should include all working space under your control (if desired, you may break down the area into different categories; e.g., office, vault, communications center, etc.).
- 3. In order to identify the locations of your properties, it is suggested that each property number be preceded by a letter denoting its location. In a separate Dispatch, please furnish a list of these designated letters with their locations.
- 4. Two copies of your updated summary are being transmitted under separate cover. These copies should be maintained on a current basis. One copy showing all changes through the end of May 1970 is to be promptly returned to Headquarters in order that our records may be revised.
- 5. This system of keeping the real property records current was designed to aid you and will be a continuing method of semiannual reporting of real property.
